DETAILED ACTION

Election/Restrictions

Claims 1-21, 25-32 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected claims, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/8/05.

Drawings

Figure s 29(A) through 38 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 22-24 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's

Admitted Prior Art (APA).

Art Unit: 2813

The following claimed limitations are anticipated by the APA found in Applicant's own specification as cited below:

22. A semiconductor device, comprising: a semiconductor substrate including first and second area;

a plurality of first conductive patterns formed in the first area (103a-capacitor side);

a plurality of second conductive patterns formed in the second area (103a/103b), said second conductive pattern having a structure different from said first conductive pattern (larger size as shown in Fig.37);

first, second, third and fourth insulating films formed on said second conductive pattern (119, 122, 124, 127); and said third and fourth insulating films formed on the first conductive pattern (122, 124) (Fig.37).

23. A semiconductor device according to claim 22, further comprising side spacers (114b) formed on side walls of said first conductive pattern (103a), said side spacer having a same composition as said second insulating film (107) (Fig.33).

24. A semiconductor device according to claim 23, further comprising:

first source/drain regions (113) formed in a surface layer of said semiconductor substrate (101) on both sides of said first conductive pattern (103a), said first source/drain regions not formed with a silicide layer 113); and second source-drain regions (117) formed in a surface layer of said

semiconductor substrate (101) on both sides of said second conductive pattern (103b), said second source/drain regions formed with a silicide layer (118) (Fig.37).
